

# Application Migration, Modernization and Transformation

**DXC Modernization Studio**

**Neil Waller and Joe Paulsen**

# DXC offering families

## Cloud & Platform Services

We help clients maximize their private cloud, public cloud and legacy infrastructure, as well as securely manage their hybrid environments.

## Security

Our security solutions help predict attacks, proactively respond to threats, ensure compliance and protect data, applications, infrastructure and endpoints.

## Enterprise & Cloud Apps

We provide industry, business process, systems integration and technical delivery experience to maximize value from enterprise application portfolios.

## Workplace & Mobility

Our workplace, mobility and IoT services help clients embrace new ways of working and build a secure, user-centric, digital workplace.

## Application Services

Our comprehensive services help clients develop, manage and modernize their apps.

## Consulting

We help clients accelerate their digital transformations and business results with industry, business, technology and complex integration services.

## Analytics

Our portfolio of analytics services and robust partner ecosystem help clients gain rapid insights and accelerate their digital transformation journeys.

## Business Process Services

We provide seamless digital integration of front and back offices. The result: unlimited business outcomes.

## Industry Solutions & Services

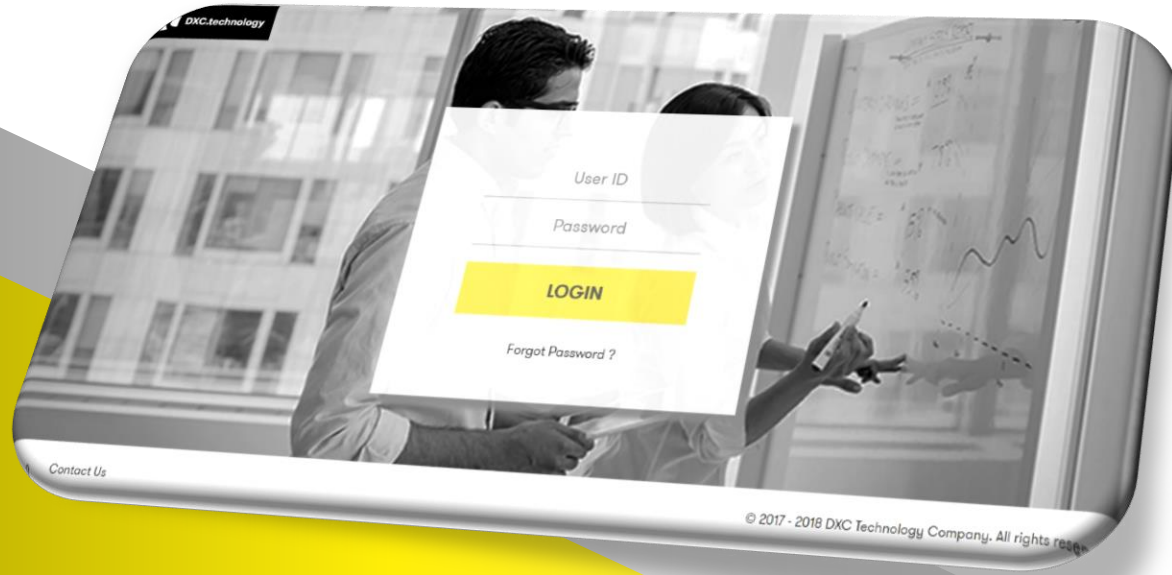

Our industry-specific solutions enable businesses to quickly integrate technology, transform their operations and develop new ways of doing business.

# DXC Modernization Studio

Key benefits for bringing value to the customer

# What is the DXC Modernization Studio?

**DXC Modernization Studio** is a framework containing DXC IP and Vendor products which has been developed and shaped along the Modernization path DXC had already made with **hundreds of customers** all over the globe.

It is built on top of computerized tools (incl. **AI** apps), repositories, analytics tools, dedicated workflow engine, historical data from **multiple successful customer case studies**, and many more.

## Studio's Focus:

- ✓ Connected marketplace of best in breed solutions from DXC and its partner network
- ✓ A sophisticated data model surrounding a Single Source of Truth
- ✓ All solutions are plugged into a central API layer "Swagger"
- ✓ End to end from first advisory through to migration
- ✓ Connects the application and infrastructure knowledge together
- ✓ Continuously incubating new exciting DXC client services from the data bank of knowledge and patterns 600k Apps

# Studio aims to solve the following common customer problems

## Value

## Time

## Risk

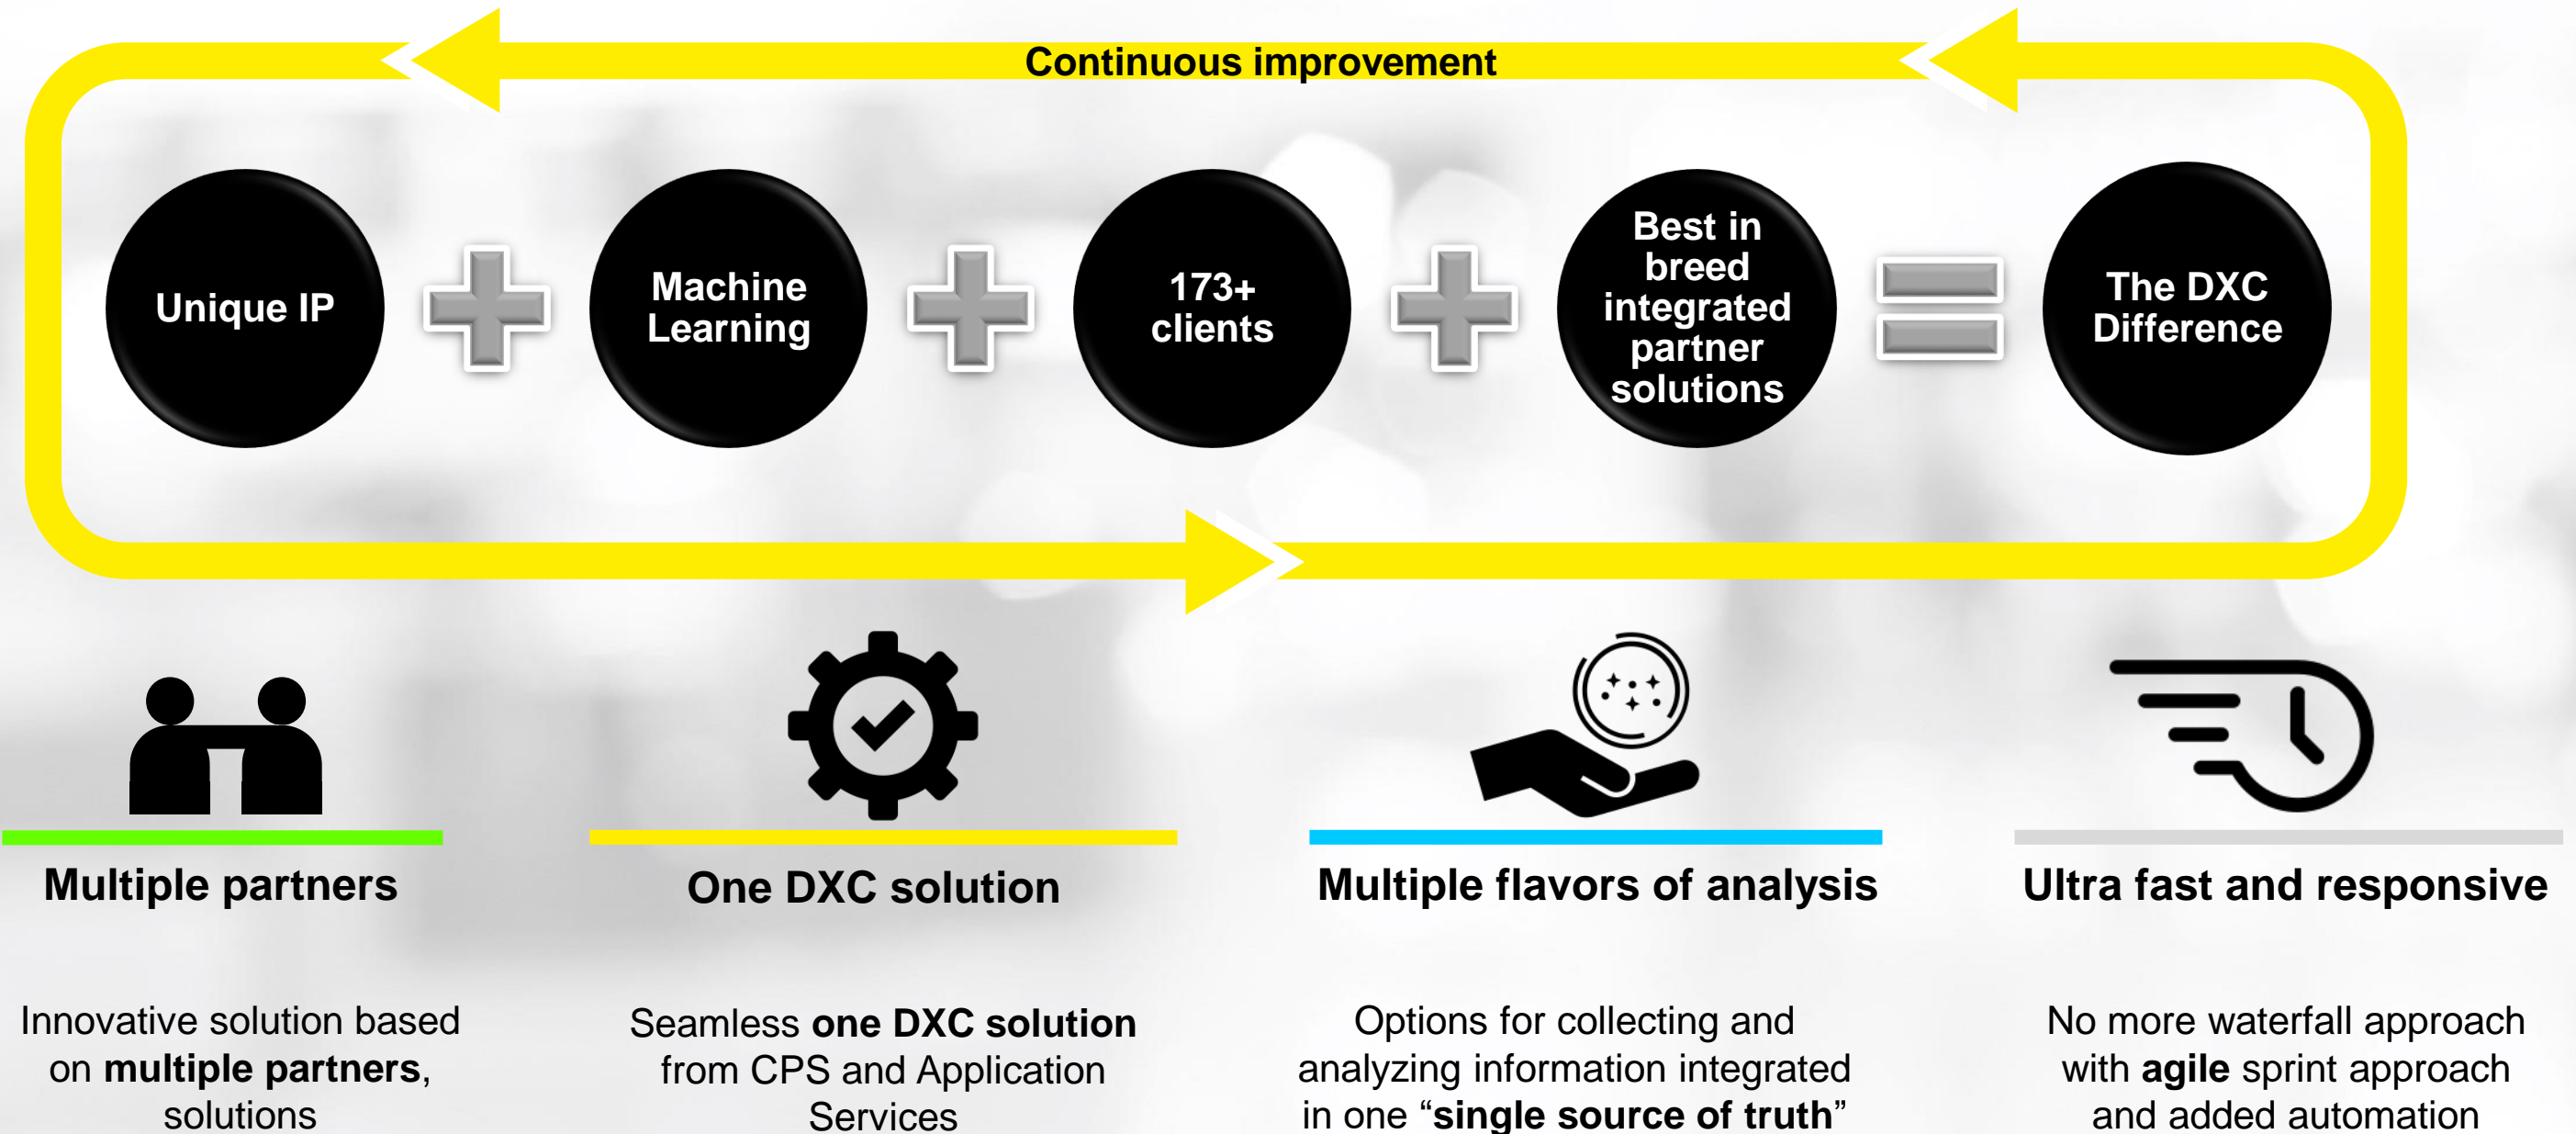

- I moved my low hanging fruit to cloud, it's **expensive** and I'm stuck with the **rest of the apps**
- Acquired new company and **don't have enough information about the IT estate**
- I have an **overprovisioned IT estate** and need a strategy to address it
- SaaS first; Public cloud first, **I need to be there now!**
- I need a **strong business case** to support my transformation

- **I don't have the staff / knowledge** to move to cloud as quickly as the business needs us to
- **Too many applications** which are old and need to be properly maintained
- Manual assessments take **too long** and are costly

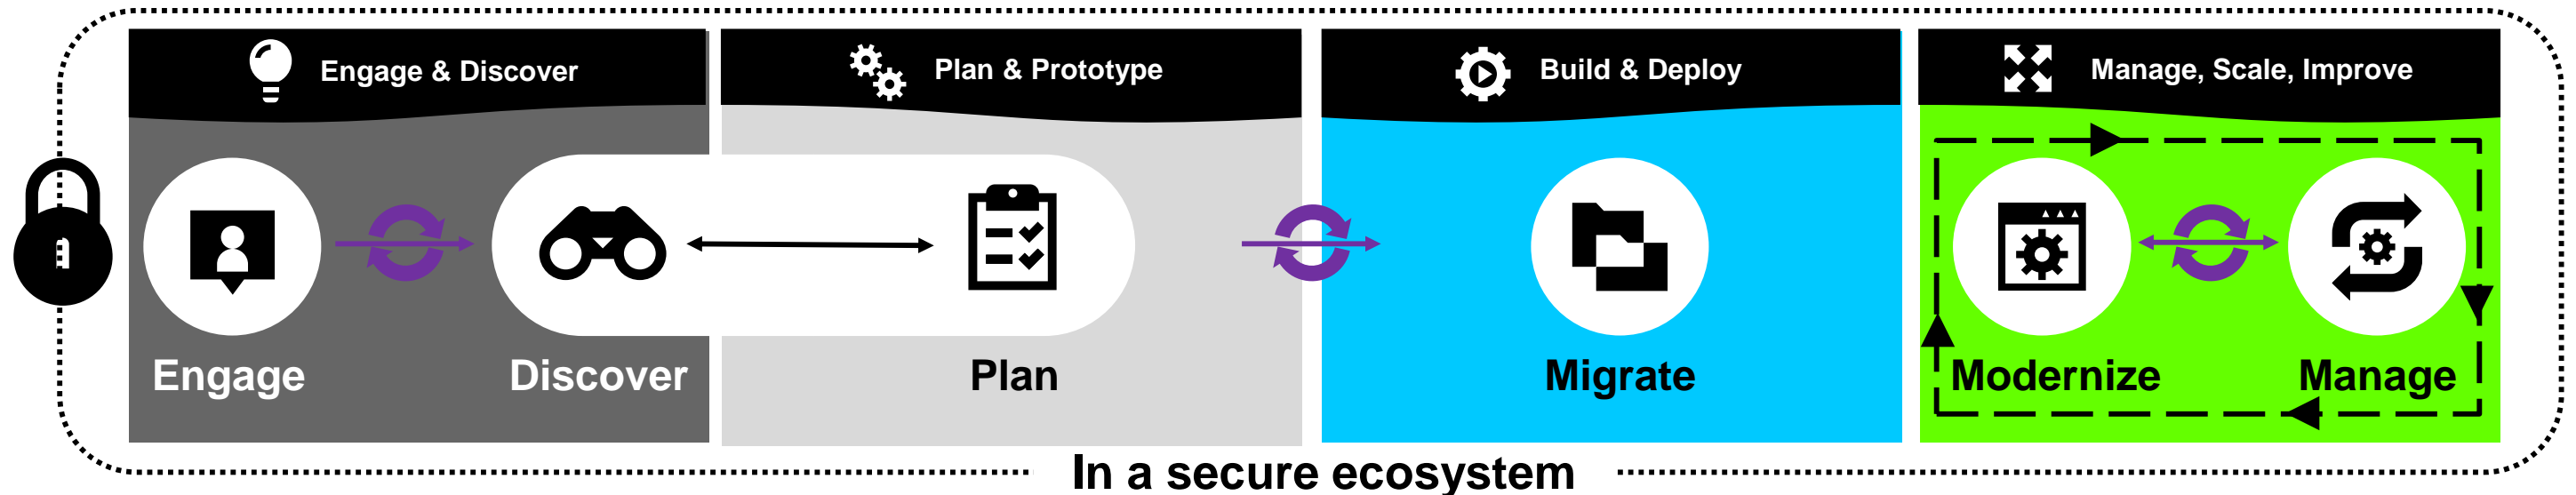

- Last time transformation was **promised and not delivered**
- **Apps running on old systems** which no one knows and can't operate/update
- **Apps causing outages** affecting the business without obvious solutions
- Components going **End of life**
